

FSP Workshop
March 26 - 28, 2008

Wednesday, March 26, 2008

12:30		Lunch
14:00-14:10	Oswin Aichholzer and Bert Jüttler	Opening
14:10-14:30	Szilvia Bela	Approximating implicitly defined curves by fat arcs
14:30-14:50	Xinhua Song	Circular spline approximation
14:50-15:20		Coffee Break
15:20-15:50	Matthias Fuchs	Elastic deformations and shape metrics
15:50-16:20	Bernhard Kornberger	Medial axis computation in 3D
16:20-16:50	Hans-Peter Schröcker	Synthesis of four-bar mechanisms

Thursday, March 27, 2008

Individual research seminars in working groups. Several rooms are available.

Friday, March 28, 2008

9:00-9:30	Martin Peternell	On a remarkable class of rational surfaces in 4-space generalizing surfaces with linear normal vector fields
9:30-10:00	Martin Kilian	Curvigami
10:00-10:30		Coffee Break
10:30-11:15	Wolfgang Aigner and Margot Oberneder	Medial axis computations
11:15-12:00	Birgit Vogtenhuber	Pointed Drawings of Planar Graphs
